

Tri-County Veterinary Services Surgery/Anesthesia Consent Form

OWNER'S NAME _____ PET'S NAME _____

PROCEDURE _____ DATE _____

Please take a few minutes to answer and update us on your pet's general condition and to inform us of any possible problems that we may encounter today.

1. Have you fed your pet today? (Day of surgery) Yes ___ No ___
2. Has your pet been unwell in the last week (ie. Vomiting, diarrhea, sneezing, coughing, etc.)?
Yes ___ No ___ If yes please explain _____
3. Does your pet have any past or present major illnesses or conditions? Yes ___ No ___
Please circle all that apply: Seizures Diabetes Heart Disease Kidney Disease ___ Other ___
4. Is your pet currently on any medications? Yes ___ No ___
If yes please list medications _____
5. Has your pet had any previous anesthetic reactions? Yes ___ No ___
If yes please explain _____
6. Has your pet had any previous vaccine reactions? Yes ___ No ___
If yes please explain _____

7. Pre-anesthetic Examination & Testing

A complete physical exam will be performed on your animal prior to the above procedure(s), but this may not identify all systemic or metabolic problems. For this reason, we highly recommend that surgery patients have the pre-anesthetic tests within 4 weeks of the procedure to evaluate major organ functions prior to any procedure requiring sedation, tranquilization and/or general anesthesia.

(Initial the following) Pre-anesthetic blood work (\$60.00) Accept ___ Decline ___

8. Pain Management

Our hospital believes in compassionate, quality medical care for our patients. All surgical patients will receive pre-operative pain management. We highly recommend that all surgical patients receive pain management for postoperative recovery at home.

(Initial the following) Pain Medication RX (additional \$12.00) Accept ___ Decline ___

9. Pregnancy Check

If your pet is pregnant, do you still want her to be spayed? Accept ___ Decline ___

Do you want us to determine **before surgery** if she is pregnant? Accept ___ Decline ___

10. In Heat

If your female dog or cat is in heat, there is an added risk of bleeding during surgery caused by the hormones. This can be life threatening. If you want to reduce this risk, you need to wait at least two weeks after they go out of heat to have the surgery performed.

11. Vaccinations

If proof of current vaccinations are not provided, we will update while patient is hospitalized.

The undersigned hereby warrants that he or she is the owner or authorized agent for the owner of the above animal and does hereby consent and authorize Tri-County Veterinary Services to perform the procedure(s) listed above plus any and all services incidental thereto.

The undersigned understands that all anesthesia and surgery involves some minimal risk to the pet and acknowledges that no guarantees have been made as to the result and regardless of results; the undersigned will remain fully responsible for the costs of all services provided by Tri-County Veterinary Services.
